- When you connect to the Internet using HughesNet, the upload and download speeds you experience will vary based on a variety of factors including the configuration of your computer; the number of concurrent users; network or Internet congestion; the speed of the Websites you are accessing; and other factors. Stated speeds and uninterrupted use of service are not guaranteed. During peak hours, actual upload and download speeds will likely be lower than speeds indicated.
 - Based on an analysis of customer usage data, Hughes has established a download threshold for each of the HughesNet service plans that is well above the typical usage rates. Subscribers who exceed that threshold will experience reduced download speeds for approximately 24 hours. During this recovery period, the HughesNet service may still be used, but speeds will be slower.
